## SOFTWARE ANALYSIS AND FORENSIC ENGINEERING CORPORATION

10981 Willow Valley Court, Las Vegas, Nevada 89135 • (650) 741-5809 • [www.SAFE-corp.com](http://www.SAFE-corp.com)

### CodeSuite Pricing

CodeSuite has two licensing models, pay per use and pay per time.

#### *Pay per Use*

License tokens cost \$10 each. To run different programs within CodeSuite requires different number of license tokens, depending on the number of bytes of code being examined. The costs are shown in the table below. To find out the number of license tokens needed for the code you want to analyze, download CodeSuite and run the job. CodeSuite will tell you how many licenses you need.

CodeSuite Tool	Cost	CodeSuite Tool	Cost
BitMatch®	\$100 per MB	CodeSplit®	\$10 per MB
CodeCLOC®	\$20 per MB	SourceDetective®	\$20 per 100 searches
CodeCross®		FileCount™	free
<i>Same name files*</i>	\$10 per MB	FileIdentify™	free
<i>All files</i>	\$50 per MB	FileIsolate™	free
CodeDiff®		HTML Preprocessor™	free
<i>Same name files*</i>	\$10 per MB	HTML Report Generators	free
<i>All files</i>	\$100 per MB	Spreadsheet Generators	free
CodeMatch®			
<i>Same name files*</i>	\$40 per MB		
<i>All files</i>	\$400 per MB		

\*This option compares only files whose names are identical, within the entire group of files specified for comparison.

#### *Pay per Time*

If you have an ongoing need for CodeSuite, you can purchase a 6-month unlimited-use license for \$50,000 or a one-year unlimited-use license for \$100,000.

#### *For Larger Jobs*

CodeSuite-MP is a version of CodeSuite that runs on a multicore machine for faster processing. Costs for running any CodeSuite tool on CodeSuite-MP increases the cost by 10% per independently running process.

#### *Training*

We can arrange a full day of live training at \$1,000 per person or \$500 for online training to bring you up to speed using CodeSuite effectively. The training begins with an introduction to important intellectual property (IP) issues relating to software. It also includes ways to reduce your costs by showing you how to eliminate third party code and other code that does not need to be compared. We teach how and when to use the less expensive tools like CodeDiff before performing an in-depth CodeMatch run. We also teach how to interpret results and how to effectively use the CodeSuite filtering and spreadsheet features to extract important data from the analysis. You will also learn how to prepare an expert report for submission to court in a lawsuit.
